

## Claims

- [c1] A toilet with ventilation apparatus, comprising: an open air passageway from a bowl through a rim, flush valve and overflow tube to an air space above water in a tank; and a conduit from the air space to outside a room where the toilet is located.
- [c2] The apparatus of Claim 1 with the conduit passing through a lid for the tank.
- [c3] The apparatus of Claim 2 with a seal between the lid and a top rim of the tank.
- [c4] The apparatus of Claim 1 with the conduit being integrally formed in a wall of the tank.
- [c5] The apparatus of Claim 4 with the conduit being formed in a back wall of the tank.
- [c6] The apparatus of Claim 4 with a seal between the lid and a top rim of the tank.
- [c7] A toilet with ventilation apparatus, comprising: an open air passageway from a bowl through a rim, flush valve and overflow tube to an air space above water in a tank; a conduit from the air space to outside a room where the toilet is located; with the conduit being integrally formed in a back wall of the tank; and with a seal between the lid and a top rim of the tank.
- [c8] The apparatus of Claim 1 with the conduit being a tube passing through an aperture in a bottom wall of the tank.
